

Variable Fuel Surcharge

UK Mail varies the rate of fuel charged to your account, so that as fuel prices increase and decrease, so does the fuel rate applied to your account. As a result of the rises in the cost of fuel over recent months, as from 1st May, 2011, our variable fuel will be increased to **7.65%**. This will be applied to your next invoice. For every 2p reduction or increase on a litre of fuel, we will apply a discount or increase to your invoice of 0.85%

Examples of incremental changes to the variable fuel rate are as follows:
